# INTRODUCTION

"Real magic." These are the words that echo in Lara's head as she contemplates the mighty Swedish mountains above her.

Magic means supernatural, great power. It has existed through the ages, as described by many legends in many different cultures.

When Lara starts deciphering the forgotten Tome of Ezekiel, written by a mysterious medieval scholar, she is plunged into the depths of the legend.

She sets off in search of the Black Stone that lies somewhere in the icy heart of what was called Wolf's Fang Peak by the 1200esque scholar.

This is the stone that will reveal what Magic was, or still is.
